

Clinical Post
COVID Society

British Society of Physical
& Rehabilitation Medicine

Role Title: Lived Experience Working Group Representative

Location: Remote

Part-time 4 x 1 Hour Meetings by March 2025

Reports To: Clinical Leadership Group

Role Summary:

We are seeking a representative with lived experience of post covid and related conditions to join our working group. We are looking for individuals who are engaged and willing to provide constructive insight into their experiences and the experiences of others to help shape our initiatives. The role brings one element to the decision making process also considering research, opinions and experiences of clinicians and services.

The lived experience group will serve as the voice of those living with post covid and related conditions within our society; ensuring that perspectives, experiences, and needs are integrated into the decision-making processes. The society is recruiting these advisors to enable a shared goal of supporting delivery of effective Long Covid care. We want to ensure this is a collaborative relationship between Lived Experience Advisors and the Clinical Leadership Group.

Key Responsibilities:

- Patient Advocacy: Represent patient interests and concerns in meetings, discussions, and decision-making processes of the working group.
Feedback Collection: Gather feedback from patients, caregivers, and patient communities to understand their experiences, needs, and preferences.
- Communication: Act as a liaison between patients and healthcare professionals, facilitating open and effective communication.
- Education & Awareness: Educate the Clinical Leadership Group about patient perspectives and advocate for patient-centered care practices.
- Contribute to the society's membership surveys, service evaluations and research initiatives.
